PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable SaaS applications using Angular, Next.js, Node.js, and Go. Skilled in designing REST APIs, migrating enterprise applications from Angular to Next.js, developing real-time features, and implementing secure authentication and role-based access systems.

Highlights: 8+ Angular → Next.js module migrations, cutting load times by 30% • Sole backend owner of an internal system used by 200+ employees • Real-time features built with WebSockets and Twilio

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Go

Frontend: Angular, Next.js, React.js, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn UI

Backend: Node.js, Express.js, Go, REST APIs, JWT, OAuth, Socket.io / WebSockets

Database: MongoDB, PostgreSQL, MySQL

Tools: Git/GitHub, Postman, Jira, VS Code, Figma, Chrome DevTools

Other: Twilio, API Integration, Agile

PROFESSIONAL EXPERIENCE

Clodura.AI : Software Engineer

Feb 2024 – Present

- Owned the migration of 8+ Angular modules to Next.js, improving page load speed and SEO visibility across the platform.
- Improved page load and API response times by 30% by eliminating redundant API calls and introducing a caching layer.
- Built a Twilio-based dialer feature with call usage tracking and call recording management, integrated into the core sales workflow.
- Implemented unlock workflows, entitlement validation, and bulk export functionality for a high-traffic contact search module.
- Built a reusable UI component library using Next.js, React, TypeScript, Tailwind CSS, and Shadcn UI, adopted across multiple modules.
- Worked extensively with RTK Query for optimized API state management and caching.
- Implemented authentication, authorization, and role-based access control across the platform.
- Developed real-time communication features using WebSockets and Socket.io.

Zongovita Pvt. Ltd. : Software Developer

Sept 2023 – Feb 2024

- Sole backend developer for a company-wide Attendance Management System — designed and built the entire Node.js architecture from scratch, used daily by 200+ employees.
- Built RESTful APIs for attendance tracking, leave requests, and reporting for the internal team.
- Implemented authentication and authorization to ensure secure employee access.
- Worked with MongoDB for schema design and day-to-day data operations.
- Fixed production issues and improved overall application performance.
- Collaborated with designers and backend developers to deliver new features.
- Participated in sprint planning, testing, and deployment activities.

PROJECTS

PostAgent — Autonomous LinkedIn Content SaaS

Go, MongoDB, Gemini/LLM, Docker, Render | [Live Demo](#)

- Built a full-stack, multi-tenant SaaS that researches trending tech topics, generates on-brand LinkedIn posts with AI-generated images, and auto-publishes them to each user's account on a schedule.
- Implemented "Sign in with LinkedIn" OAuth, per-user data isolation, and a self-healing cron scheduler that publishes using each user's own tokens.
- Engineered a pluggable LLM/image pipeline (Gemini, OpenRouter, Ollama, Pollinations) in Go, backed by MongoDB, containerized with Docker, and deployed on Render.

EDUCATION

Master of Computer Applications (MCA), Krishna Institute of Engineering and Technology, Ghaziabad
Full Stack Web Development, Masai School, Bengaluru

2019 – 2021
2022 – 2023

SOFT SKILLS

Leadership, Adaptability, Team Work, Time Management, Problem Solving
