

HIMANSHU CHOUDHARY

Software Engineer / Full Stack Developer

Muzaffarnagar, U.P. | +91 8433250941 | baliyanh10@gmail.com | github.com/himanshu60 | himanshu60.github.io

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable SaaS applications using Angular, Next.js, Node.js, and Go. Skilled in designing REST APIs, migrating enterprise applications from Angular to Next.js, developing real-time features, and implementing secure authentication and role-based access systems.

Highlights: 8+ Angular → Next.js module migrations, cutting load times by 30% • Sole backend owner of an internal system used by 200+ employees • Real-time features built with WebSockets and Twilio

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Go

Frontend: Angular, Next.js, React.js, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn UI

Backend: Node.js, Express.js, Go, REST APIs, JWT, OAuth, Socket.io / WebSockets

Database: MongoDB, PostgreSQL, MySQL

Tools: Git/GitHub, Postman, Jira, VS Code, Figma, Chrome DevTools

Other: Twilio, API Integration, Agile

PROFESSIONAL EXPERIENCE

Software Engineer | Clodura.AI | Jan 2024 – Present

- Owned the migration of 8+ Angular modules to Next.js, improving page load speed and SEO visibility across the platform.
- Improved page load and API response times by 30% by eliminating redundant API calls and introducing a caching layer.
- Built a Twilio-based dialer feature with call usage tracking and call recording management, integrated into the core sales workflow.
- Implemented unlock workflows, entitlement validation, and bulk export functionality for a high-traffic contact search module.
- Developed and maintained enterprise-scale B2B SaaS modules — including Company Profile, Contact Search, and Dialer — using Angular, Next.js, Node.js, and Go.
- Built a reusable UI component library using Next.js, React, TypeScript, Tailwind CSS, and Shadcn UI, adopted across multiple modules.
- Worked extensively with RTK Query for optimized API state management and caching.
- Implemented authentication, authorization, and role-based access control across the platform.
- Developed real-time communication features using WebSockets and Socket.io.
- Collaborated with product managers, QA, and design teams throughout the Agile SDLC, including sprint planning and code reviews.

Software Developer | Zongovita Pvt. Ltd. | Jul 2023 – Dec 2023

- Sole backend developer for a company-wide Attendance Management System — designed and built the entire Node.js architecture from scratch, used daily by 200+ employees.
- Built RESTful APIs for attendance tracking, leave requests, and reporting for the internal team.
- Implemented authentication and authorization to ensure secure employee access.
- Worked with MongoDB for schema design and day-to-day data operations.
- Fixed production issues and improved overall application performance.
- Collaborated with designers and backend developers to deliver new features.
- Participated in sprint planning, testing, and deployment activities.

EDUCATION

Master of Computer Applications (MCA) | Krishna Institute of Engineering and Technology, Ghaziabad | 2019 – 2021

Full Stack Web Development | Masai School, Bengaluru | 2022 – 2023

SOFT SKILLS

Leadership • Adaptability • Team Work • Time Management • Problem Solving
